

How to make a fabric ball

First, determine the size you want the ball to be and then you can decrease or increase the pattern size by using the photocopier. Cutting on the bias, trace out (6) of the pieces here.

Pin two pieces, right sides facing, sew together. Add a third piece to the two sewn, right sides facing, sew together. Repeat with the last three pieces.

You should then have (2) cup shapes, made of three pieces each. Stack them inside each other, right sides facing. Sew one side from top to bottom, the second side, sew halfway to leave room to fill.

Fill with poly fill. I add a jingle bell in the middle for fun. You can also fill with lavender to make your own sachets. Use them however you like. I make them to match my baby blankets. I am sure you have your own ideas!

Sew up the last section by hand, I like to use a thick amount of embroidery thread to add color.

Enjoy!
